PROFESSIONAL SUMMARY

Cybersecurity undergraduate at APU with hands-on experience in enterprise networking, Linux administration (Red Hat), and digital forensics. Designed multi-branch network topologies, hardened Linux servers, and carried out disk and memory forensic investigations. TryHackMe Top 15% globally. Seeking a 16-week to 6-month cybersecurity or network engineering internship from May 2027.

EDUCATION

Asia Pacific University of Technology & Innovation (APU) | Kuala Lumpur, Malaysia | Expected: July 2028

BSc (Hons) Computer Science, Major in Cybersecurity | Current CGPA: 3.29

TECHNICAL SKILLS

Networking: Cisco Packet Tracer, OSPF, HSRP, EtherChannel, VLAN, DHCP, IPv6, Subnetting, DHCP Snooping, DAI, Port Security

Systems & Security: Linux (Red Hat, Rocky, Ubuntu), BIND9, Apache, Postfix, Dovecot, Fail2ban, Cowrie Honeypot, WireGuard VPN, SSL/TLS, Docker, Wireshark (TCP Stream Analysis)

Digital Forensics: Autopsy, Volatility, VirusTotal, disk and RAM analysis

Programming & Tools: Python, Java, C#, Bash, Git, FastAPI, scikit-learn

PROJECTS

Enterprise Network Design | *Cisco Packet Tracer*

- Designed a 4-site enterprise network, migrating from static routing to OSPF, HSRP, and EtherChannel for high availability.
- Applied VLAN segmentation and Layer 2 security controls (DHCP Snooping, DAI, Port Security) to reduce internal threats.

Linux Enterprise Infrastructure | *BIND9*, *Postfix*, *Dovecot*, *Apache*, *Fail2ban*

- Deployed a simulated corporate environment with DNS, email, and web services secured with SSL/TLS.
- Hardened servers with Fail2ban for automated intrusion prevention and deployed a Cowrie honeypot to log attacker behavior.

SOC Home Lab (In Progress) | *Wazuh*, *Rocky Linux*

- Building a Wazuh-based security monitoring lab on a Rocky Linux VM to collect and visualise security events.

Digital Forensic Investigation | *Autopsy*, *Volatility*, *VirusTotal*

- Analyzed a compromised Windows 10 system using disk imaging and RAM analysis; traced malware execution paths and documented findings in a technical report.

AI Customer Feedback Classifier | *Python*, *FastAPI*, *Streamlit*, *Ollama*

- Built an end-to-end sentiment analysis tool (FastAPI backend, Streamlit UI) with a local Ollama LLM that drafts context-aware replies.

CERTIFICATIONS

- **Red Hat System Administration II (RH134), Ver. 10** | Red Hat Academy | Oct 2026 (Course Completion)
- **Red Hat System Administration I (RH124), Ver. 10** | Red Hat Academy | Oct 2026 (Course Completion)
- **Red Hat Getting Started with Linux Fundamentals (RH104)** | Red Hat | Jul 2026
- **Cisco Introduction to Networking (Learn-A-Thon 2025)** | Cisco Networking Academy | Nov 2025
- **TryHackMe Cyber Security Training** | TryHackMe | Oct 2025 (Top 15% global ranking)

CTF & HANDS-ON PRACTICE

CTFs: K17 CTF 2026 and TFC CTF 2026 with team 'Honeypod' (APU); solved Crypto, Web, Forensics and Reverse Engineering challenges, with writeups on GitHub.

TryHackMe: Top 15% globally; currently on the Jr Penetration Tester path (SOC operations, Linux privilege escalation, web exploitation).

LEADERSHIP & ACTIVITIES

Academic Team Leader, APU: Led group projects, coordinated tasks and deadlines; mentored peers in Linux and Packet Tracer troubleshooting.

AVAILABILITY

Full-time internship (16 weeks to 6 months) from May 2027. Open to part-time or short-term roles immediately.
